# SUBLIMATION

FAQS AND INFORMATION

## WHY SUBLIMATION?

You want the images and text personalization on your personalize products to last. Because of the nature of the sublimation process the ink will not scratch off and does not fade in the wash. Ceramic products are truly dishwasher safe unlike traditional silk screen print. Colors on fabrics will not fade in the washing machine.

## WHAT IS SUBLIMATION?

Sublimation is a decoration process where ink is transferred to a substrate such as metal, glass, ceramic, or fabric and in the process chemically bonded to it. This is achieved with a combination special inks, heat, and pressure. The result is a super permanent imprint that does not scratch or fade. The decoration literally becomes a part of the finished product rather than just sitting on the surface.
